

## ABOUT ME

My name is Le Hoai An, I am an IT student.

I graduated in 2019, but it wasn't long before there was a pandemic that I couldn't apply for a job.

I am currently unemployed and looking for a job. Currently I am also the main source of labor for the family so I would appreciate it if you give me a chance.

**Goal:** I want to find a job in a good environment, can learn to enrich my knowledge and learn more from knowledge and experience from seniors as well as from real projects.
